# AZ-900 Course - 2024-07-11 & 12

Question(s):

Answer(s):

#3: Users should have just enough access to do their job principle of least privilege().
For instance, if a user needs only Read access, don't give them the Owner, Contributor,
or Write access. High privileged users will have access and can make unwanted
modifications. See this document
https://learn.microsoft.com/en-us/entra/identity-platform/secure-least-privileged-access

Thanks,
Reza
